Subject: Aluminum Side Mount Hangers for Torflex Axles

In keeping with our continual commitment to product improvement, Dexter Axle is pleased to announce the development of an additional mounting option for Torflex axles. When top mounting Torflex axles to a tubular frame, the connections tend to loosen which can result in bracket failure. Dexter has engineered an aluminum side mount bracket that can be welded to aluminum trailer frames. This allows Torflex axles to be side mounted to the bracket thus eliminating the potential of loosening connections.

New Side Mount Hanger Features

- Strong, weldable grade of aluminum.
- Provides proper support of the mounting hanger to the trailer frame.
- No drilling required for axle attachment.
- Less labor intensive than bolt-on method.
- Available on #9 thru #12 Torflex axles.

New Side Mount Hanger Kits Available

- A/P-180-00 (#9 Torflex)
- A/P-181-00 (#10 Torflex)
- A/P-182-00 (#11 Torflex)
- A/P-183-00 (#12 Torflex)

Please contact your Dexter Sales Engineer with additional questions or ordering information.
