

PRODUCT BULLETIN #419

Date: April 13, 2020

Subject: Legacy AL-KO Wheel Stud Update

Dexter Axle is consolidating two legacy AL-KO wheel stud part numbers. The decision will allow customers to service existing AL-KO drums with a familiar Dexter part number. The replacing wheel stud retains the same characteristics as what was found in the prior two designs, and will be inserted with the existing kit part number.

The legacy AL-KO wheel stud part number A1530093 and Dexter wheel stud part number 007-360-01 have been made obsolete. Both wheel studs are being replaced by 007-262-01 (see table below).

OBSOLETE PART NUMBER	REPLACEMENT PART NUMBER	DESCRIPTION
A1530093	007-262-01	STUD PRESS IN 1/2-20 X 2.50 ZINC PLATE
007-360-01	007-262-01	STUD PRESS IN 1/2-20 X 2.50 ZINC PLATE

The legacy wheel stud was used in AL-KO's 6 lug 12" hub-drum. The replacing wheel stud can be found within Dexter's existing 12" hub-drum product line and is a suitable replacement that will provide an ongoing solution for service.

Affected Part Numbers:

DEXTER PART NUMBER	AL-KO PART NUMBER	DESCRIPTION
008-484-05	A363239	12" HUB-DRUM, 655, 15123 OUTER, CUPPED & STUDED
K71-848-00	AK363909	1/2" - 20 WHEEL STUD MOUNTING KIT, ZINC
