Subject: Heavy Duty Dust Shields on 12.25" Drum Brakes

Dexter is pleased to announce a new option to the standard axle product line. Heavy duty dust shields are now available for 12.25" drum brakes on standard and drop center axles. These dust shields are made from 18 gage steel and are powder coated. Along with a vibration resistant stainless steel T-Bolt style clamp, these dust shields are designed to last in the most severe conditions. Order them installed on your axle or as a separate service kit.

Service Kit - Two Kits are Required for One Axle
