

# PRODUCT BULLETIN #450

Date: October 12, 2021

## Subject: Discontinuing Manual Adjust Electric Brakes D72 / #12V

In the interest of supplying safe product solutions, Dexter will only offer forward self-adjusting electric brakes on 7,200 lb. capacity axle models using 12-1/4" x 2-1/2" electric brakes.

This product change will affect all axle orders for the following axle models with D72, S72, D75, #12V, and S12V electric brakes. Existing axle configurations that may have historically been purchased with a manual adjust brake will now be supplied with a forward self-adjusting brake.

Service kits for the manual adjust brake assemblies, and related components, will continue to be available for Dexter.

FORWARD SELF-ADJUST PART NUMBER	MANUAL PART NUMBER	DESCRIPTION
K23-622-00	K23-428-00	Brake Kit 12 1/4" x 2 1/2" Cast 4 Hole - LH
K23-623-00	K23-429-00	Brake Kit 12 1/4" x 2 1/2" Cast 4 Hole - RH

**Note:** Forward self-adjusting and manual brake assemblies should **not** be mixed by axle or by trailer. If replacing a legacy manual brake assembly with a forward self-adjusting brake assembly, be advised that all brake assemblies on the trailer also need replaced.

Please contact your Dexter account manager for additional information and further assistance.
