Subject: New Dexter Ventadome® Cover Design

Dexter is proud to introduce a new sleek and aerodynamic Ventadome® cover design. The modern aesthetic Ventadome cover presents the design direction for Dexter's door & vent product line moving forward.

The Ventadome cover is engineered to reduce or minimize drag caused by air flow. Made of UV resistant polypropylene, the durable cover withstands the elements of the environment. The Ventadome cover is available for the V2094, V2092, V2119, V2128, and V2392 models in either a white or smoke color.

Please contact your Dexter account manager for additional information and further assistance.
