Subject: Discontinuing Tapped Idler Hubs and Associated Kits

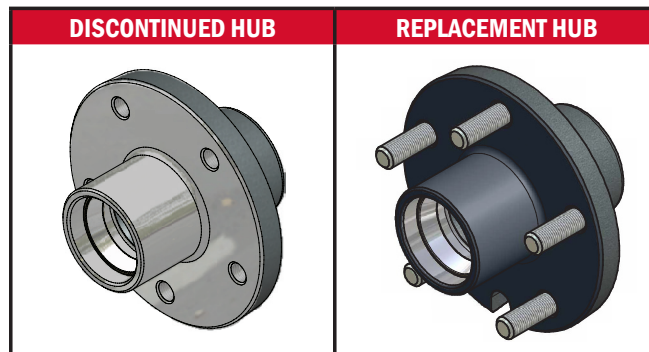

Dexter is discontinuing the tapped idler hubs and associated kits. The tapped hubs and kits will be discontinued once inventory is exhausted. For field replacement of the tapped hubs, the studed idler hub and associated kits can be utilized. Below is a chart with the tapped hub kits and appropriate studed kit. On page two, there is a listing of the conversion kits and their bills of materials. Currently, these hub kits are only available at Dexter's Atlanta plant.
