**Subject: Upgrade to Aluminum Wheel Cylinder for 10", 12", and 13" Drum Brakes**

Dexter is pleased to announce a product improvement across the hydraulic drum brake line. The 10", 12", and 13" brake offerings will migrate to aluminum wheel cylinders for improved corrosion resistance. This product upgrade will require certain Dexter component part-numbers to be obsoleted and replaced by aluminum versions. The brake assembly part numbers will not change.

Dexter currently offers aluminum wheel cylinder kits which can be used as service parts for both the steel and aluminum versions. Please refer to the table in this bulletin to determine which wheel cylinders have been obsoleted and the replacement part numbers for aluminum replacement kits.

This will be a running change once current inventory of steel cylinders has been exhausted.

OBSOLETE P/N	REPLACEMENT KIT P/N	REPLACEMENT KIT PART DESCRIPTION
054-064-00	K71-130-00	WHEEL CYLINDER KIT, UNI-SERVO, LH, FITS MOST 10", 12", AND 13" DRUM BRAKES
