REPLACEMENT 2,500 LBS. 5-BOLT GAL-DEX® IDLER HUB KITS

May 9, 2024

Dexter is discontinuing the 2,200 lbs. GAL-DEX® idler hub (008-258-50) and replacing it with the 2,500 lbs. GAL-DEX idler hub (008-448-13). The discontinuation of this idler hub will also affect two service kits, K08-258-93 and K08-258-94. Dexter will continue to sell the idler hub (008-258-50), and kits (K08-258-93 and K08-258-94) until inventory has been exhausted. This change will not increase the carrying or braking capacity of Dexter #8, #9, M9, and D20 axles.

Please see the chart below with the kits that contain the 2,500 lbs. GAL-DEX idler hub (008-445-15), which can be ordered in place of the discontinued hub and kits. The GAL-DEX coating provides corrosion protection, surpassing 500 hours of salt spray testing. Dexter strongly recommends that all hubs on the trailer be replaced simultaneously when transitioning to the 008-448-13 hub.

OBSOLETE PART NUMBERS:

OBSOLETE P/N	DESCRIPTION	REPLACEMENT P/N
008-258-50	5 ON 4.5, HUB, 2.2K LBS., GAL-DEX, 6.50 DIA	008-448-13
