

PRODUCT BULLETIN #499

REVISED KODIAK® BY DEXTER

PART NUMBERING SYSTEM

July 18, 2024

Dexter has implemented a new part numbering methodology for the Kodiak® by Dexter disc brake product line. This new methodology merges the Dexter and Kodiak part numbers to make part number identification more convenient and consistent for customers.

A few resources have been created to make this transition easier for customers:

- » Downloadable part number cross reference, including current and both legacy part numbers - www.dexteraxle.com/kodiakcr.
- » [Kit number identification](#) guide to help identify brake type, size, coating, and capacities.
- » Updated POP items on the Dexter literature portal for customers: www.dexteraxle.com/litportal. *Registration is required to access.*

For more information on the Kodiak by Dexter product line, please visit www.dexteraxle.com/kodiak.

Please contact your Dexter account manager for additional information and further assistance.

A handwritten signature in black ink that reads 'Jay Klinkerman'.
