

PRODUCT BULLETIN #503

3,500 - 7,000 LBS.

GALVANIZED HUB OFFERING

September 16, 2024

Dexter is pleased to announce that galvanized idler hubs are now available on Dexter axle models with 3,500 - 7,000 lbs. capacity. Galvanized hubs offer customers a broader selection and better corrosion resistance in saltwater applications. The hubs are compatible with both Dexter and Kodiak by Dexter disc brakes.

Dexter recommends using genuine Dexter or Kodiak® by Dexter disc brakes on all axles when equipping axles with these idler hubs.

Hubs can be purchased separately or as part of an axle configuration. They will be available to customers starting in September 2024.
